

# Build a Website II - Winter 2020 Club Lesson Plan

Main topic: Dynamic web with React

## DAY 1

- HTML/CSS & JavaScript refresher
- Setup Github repository
- Install CRA, Axios, Tailwind.css & other dependencies

*Note: kalau bisa sebelum day 1 rookiesnya udah disuruh bikin github acc + download [npm & node](#) sebelum kelas to make it more time efficient*

## DAY 2

- [JSX](#)
- [Components and props](#)
- Styling with [Tailwind.css](#) and [Flexbox](#)

*Note: kalau ada waktu bisa bahas sneak peek REST API & kasih lihat contoh React web apps*

## DAY 3

- [State and lifecycle](#) (e.g. counter, countdown, live clock)
- [Lists and keys](#) (e.g. [to-do list](#))
- [React Router](#)

## DAY 4

- Recap
- Work on final project

*Note: APIs for final project => [Open Weather Map](#), [Strapi](#) (build own API), [Quotes](#)*

## DAY 5

- Final project help (if needed)
- Sharing and Q&A
- Final Presentation
